

Website building: Layouts

CSS Layouts - Star - Holy grail

The following exercise contains the following subjects:

- HTML
- CSS

Question

Create a webpage template for the holy grail layout, in case you would want to use it later on.

- Header
- The middle section should be divided to 3 parts :200px for the left and the right parts. The middle one should take the rest of the screen (and inside each part just add another div to recreate the border effect that you can see in the picture)
- Footer
- Make sure to not have unwanted spaces in between elements.
