< itc >

Practice

Copy the *following code* **to a js file that is linked to an html file. Debug the code in the devtools and answer the questions**

⭐ How many times foo is being called?

⭐ What is the value of b in the 3rd time foo is called?

⭐ Who is calling too the second time?

⭐ What is the value of zoo(r) when we calculate variable w?

< itc >

Practice

More Questions:

⭐ what is the value of zoo(d) the first time koo is called?	
⭐ is there any function that is not called at all?	
⭐ Who is calling foo the first time it is being called?	
⭐ what is the greatest value being sent as a parameter to zoo?	

Debugging exercise

Bug 1

Check out this code!

Can you tell what is the bug?
You have 5 minutes.
